## EGuard

This 8.2 Mhz RF Eguard Tagging System is one of our newest developments with Perspex infills within the antenna structure.

This system also offers a modern contemporary design and strong architectural lines, manufactured in tough powder coated steel.

### Benefits:

- The systems self-tuning capability tests the environment and adapts to cope with externally electrical noise which could cause false alarms.
- With comparative tag signal recognition software the EGuard System provides a high level of operation reliability, making it much less prone to the outside disturbances.

### Accessories:

The EGuard system is compatible with any RF tag and label types as well as with LOXYS media safers.

- round hard tags
- mini hard tags
- soft tags (for thinner clothing, like fine lingerie, etc.)
- self-adhesive, deactivatable paper labels
- self-adhesive, non-deactivatable paper labels
- laminated tags
- a wide variety of other RF accessories!
